The Clark County Mosquito Control District usually begins its 2026 seasonal activities in the first week of April and will continue throughout the season until mid-October 2026. The treatment locations will be within the boundaries of Clark County, WA.

Only when mosquito larvae and/or pupae are found will they use one of the following larvicides/pupicides:

1. Altosid P35

- a. EPA#: 2724-TX-1
- b. Active ingredient: S-Methoprene
- c. Providers: Wellmark International / Clarke Mosquito Control / Target Specialty Products
- d. <https://www.centrallifesciences.com>

2. Altosid Pellets

- a. EPA#: 2724-448
- b. Active ingredient: S-Methoprene
- c. Providers: Wellmark International / Clarke Mosquito Control / Target Specialty Products
- d. <https://www.centrallifesciences.com>

3. Altosid pellets WSP

- a. EPA#: 2724-448
- b. Active ingredient: S-Methoprene
- c. Providers: Wellmark International / Clarke Mosquito Control / Target Specialty Products
- d. <https://www.centrallifesciences.com>

4. Altosid XR

- a. EPA#: 2724-421
- b. Active ingredient: S-Methoprene
- c. Providers: Wellmark International / Clarke Mosquito Control / Target Specialty Products
- d. <https://www.centrallifesciences.com>

5. Altosid XR-G Ultra

- a. EPA#: 89459-104
- b. Active ingredient: S-Methoprene
- c. Providers: Wellmark International / Clarke Mosquito Control / Target Specialty Products
- d. <https://www.centrallifesciences.com>

6. Cocobear

- a. EPA#: 8329-93
- b. Active ingredient: Mineral oil
- c. Providers: Clarke Mosquito Control
- d. <https://www.clarke.com>

7. Fourstar CRG

- a. EPA#: 85685-2
- b. Active ingredients: *Bacillus sphaericus* and *Bacillus thuringiensis israelensis*
- c. Providers: FourStar Microbial Products / Clarke Mosquito Control
- d. <https://www.clarke.com>

8. Natular G30

- a. EPA#: 8329-83
- b. Active ingredient: Spinosad
- c. Providers: Clarke Mosquito Control
- d. <https://www.clarke.com>

9. Natular G30 WSP

- a. EPA#: 8329-91
- b. Active ingredient: Spinosad
- c. Providers: Clarke Mosquito Control
- d. <https://www.clarke.com>

10. Natular XRT

- a. EPA#: 8329-84
- b. Active ingredient: Spinosad
- c. Providers: Clarke Mosquito Control
- d. <https://www.clarke.com>

11. Spheratax SPH (50 G)

- a. EPA#: 84268-2
- b. Active ingredient: *Bacillus sphaericus*
- c. Providers: Advanced Microbiologics / Target Specialty Products
- d. <https://www.targetspecialty.com>

12. Spheratax SPH (50 G) WSP

- a. EPA#: 84268-2
- b. Active ingredient: *Bacillus sphaericus*
- c. Providers: Advanced Microbiologics / Target Specialty Products
- d. <https://www.targetspecialty.com>

13. VectoBac G

- a. EPA#: 73049-10
- b. Active ingredient: *Bacillus thuringiensis israelensis*
- c. Providers: Valent BioSciences / Adapco
- d. <https://www.valentbiosciences.com>

14. VectoLex FG

- a. EPA#: 73049-20
- b. Active ingredient: Bacillus sphaericus
- c. Providers: Valent BioSciences / Adapco
- d. <https://www.valentbiosciences.com>

15. VectoLex FG WSP

- a. EPA#: 73049-20
- b. Active ingredient: Bacillus sphaericus
- c. Providers: Valent BioSciences / Adapco
- d. <https://www.valentbiosciences.com>

16. VectoMax FG

- a. EPA#: 73049-429
- b. Active ingredients: Bacillus sphaericus and Bacillus thuringiensis israelensis
- c. Providers: Valent BioSciences
- d. <https://www.valentbiosciences.com>

During the season and only in areas where adult mosquitoes cause extreme annoyance or mosquitoes can transmit disease are present, the mosquito district will use the following adulticides to control adult mosquitoes in late evening or early morning hours.

1. Duet

- a. EPA#: 2724-448
- b. Active ingredients: Sumithrin, Prallethrin, Piperonyl butoxide
- c. Providers: Clarke Mosquito Control
- d. <https://www.clarke.com>

2. DeltaGard

- a. EPA#: 432-1534
- b. Active ingredient: Deltamethrin
- c. Providers: Bayer Environmental Science / Target Specialty Products
- d. <https://www.Bayer.com>

3. Merus 3.0

- a. EPA#: 8329-108
- b. Active ingredient: Natural pyrethrin
- c. Providers: Clarke Mosquito Control
- d. <https://www.clarke.com>

For further information on the various products (labels, safety data sheets), you can visit the website of the different companies producing or distributing the pesticides (see the **Providers**).

We will post the treatment schedule on our website, including when and where **aerial** larviciding treatments and truck fogging operations for adult mosquito control will occur. The schedule may change due to weather or other factors.

For more information or to report mosquito problems, visit our website (www.ccmcd.org), phone us at 360-574-7906 or email us at info@ccmcd.org.

For information about joining the Washington State Pesticide Sensitivity Registry, visit <https://agr.wa.gov/departments/pesticides-and-fertilizers/pesticides/compliance/sensitivity-registry>. Although the mosquito district is exempt, this information is included in our public notice as required by Aquatic Mosquito Control Permit section S6.A.4.h.

The treatments made by the mosquito district are done under the Aquatic Mosquito Control general permit issued by the Washington State Department of Ecology, coverage number (WAG992014). If you have questions about this permit, please contact Ecology staff at aquaticpesticideperm@ecy.wa.gov or (360) 407-6600 or you may also contact the Ecology Aquatic Pesticides Permit Specialist, Shawn Ultican at (360) 870-3492.
